

BRAZILIAN COALITION

ON CLIMATE
FORESTS AND
AGRICULTURE

www.coalizaobr.com.br/en

More than
150 participants

About
200 specialists

REPRESENTATIVES FROM:

GOAL:

To articulate and facilitate actions for the country to promote a new model of development, based on the conciliation between agricultural production and environmental conservation.

HOW:

- Encouraging dialogue among participants, with governments and institutions in general;
- Identifying barriers and solutions;
- Defining ways to achieve solutions;
- And communicating this information to society.

Multistakeholder governance model, with a **Strategic Group**, an **Executive Group** and **8** working groups:

Low-carbon agriculture  1

Bioenergy  2

Forest Code  3

International cooperation  4

 5 Restoration and reforestation

 6 Logistics

 7 Tropical Forest Economy

 8 Valuation and ecosystem services

Brazil is the second largest agricultural exporter in the world and, at the same time, the country with the greatest biodiversity on the planet.

Boosting Brazil towards the global leadership of the sustainable and low carbon economy depends on **the diverse sectors of society** unifying their efforts.

This **diversity** is a key part of dealing with complex issues.

Dialogues among Coalition members seek to create **consensus** or **consent** in pursuit of a **common goal**: to promote an efficient management of Brazilian land use
